I'm not an expert, but I thought those articles are accessible if you access from the EPA network. Dave could better answer – he's the real guru on the articles. I just tried on our network and couldn't get into the BNA articles.

I don't know what kind of copyright infringement may or may not come into play if we copy/paste entire articles. For a strictly internal audience, it may not be an issue.

Ben,

Thanks for the digest. Sadly, I could not access the Greenwire, BNA and Inside EPA stories. They all require accounts. Is there a reason we should not copy and paste the entire articles?
